

ERA HomeGuard Alarm Kit

Description

The HomeGuard Pro from Era is a comprehensive cloud based home security kit which is WiFi enabled and controlled via smartphone. The HomeGuard Pro range is compatible with the Lightwave smart product range and the kit can be used with up to 50 sensors and 10 remote controls. The kit has a maximum range of 80 metres, it is supplied with an internal lithium backup battery as well as AA batteries for all components and it is fully wireless for easy installation. It is a versatile and customisable kit as it is fully extendable and works with all existing Era Alarm accessories, so users may pair up to 50 sensors, detectors and keypads plus 10 additional remotes and the hubs and sensors may be named for the convenience of the user.
