

Description

The Cisa Elettrika electric lock is ideal for managing the opening and closing of wooden/steel gates and entrance doors , such as apartment buildings. The unit offers high resistance to forced entry and is certified up to security grade 6 according to European standard EN 14846, guaranteed by the patented rotary hook deadbolt, which provides resistance to tensile strength of up to 2000 kg. The range comes supplied with 3 keys, fixing screws, floor striker and two spacers.

Features

- Black finish
- Inside manual exit button (L13643 & L13645 only)
- Rotary hook deadbolt
- Protective steel case
- Non handed
