

CODELOCKS CL4020 Battery Operated Digital Lock

Description

The CL4020 is a euro profile mortice sash lock with deadbolt and latchbolt, complete with double cylinder to control the deadbolt and to retract the latchbolt. With the deadbolt locked it denies access to a code user.

The key can be used to open doors for management functions such as security and cleaning. The split follower enables the inside lever to retract the deadbolt and latch to prevent accidental lock in when the deadbolt is thrown.

Clean by Codelocks is an optional finish available to special order on many Codelock products. The clear coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitisation. Clean by Codelocks features an ISO certified photocatalytic coating which offers enhanced protection against viruses, bacteria, germs and other environmental toxins. For full details please view the data sheet in the associated documents or to order please contact our Specials Department.
