

ASEC Internal Surface Proximity Keypad

Description

This internal surface fixing keypad from Asec features an integrated optional proximity reader to be used with EM cards or fobs. It is supplied with a security screw and PCB conformal coated components and it is suitable for external use when fitted with the Asec Rainshield (AS11892) which is supplied separately. With both Lock and Aux outputs as well as input for separate Wiegand reader, the keypad also has an optional backlighting feature and it supports up to 500 users. The keypad also features 12 buttons and LED indication, and it has a zinc alloy electroplated casing.

12 Buttons
