

Description

The Paxton10 Server is the hub for the entire Paxton10 system, providing simple connection to your network with support for remote access. The server is embedded on a cutting edge NUC (Next Unit of Computing) platform designed by intel® and features automatic system back up to the included 32GB backup USB key, plus flexible system restore in the event of drive failure. It is simple and easy to install with zero configuration and no web plug-ins required and a seamless upgrade process. It is suitable for unlimited web clients and though configured to Windows as standard, it is also compatible with Mac and Linux via Chrome and Safari. It has an operating temperature of 0°C to +50°C and comes complete with a 3 year warranty.

3 Year Guarantee
