Description

The CODELOCKS P1000SL Slam Latch is suitable for use with the KL1000 digital cabinet lock and allows for fast 'push shut' locking, eliminating the need to turn the lock handles to secure the cabinet or locker. It is easy to install as part of a new or retrofit installation and can be used on wooden or steel cabinets/lockers with thickness of up to 25mm. The slam latch is durable, non handed and fully adjustable.

Reversible Handing
