

Description

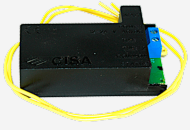

This Cisa booster is an electronic circuit that enables additional functions for a connected Cisa Elettrika locking device. The booster can also be installed on other Cisa electric rim locks and adds the following functions:

Voltage adaptor function - adjust to 12Vdc, 24 Vac, 24Vdc
Undersized power supply
Reduced input
Electric hold open function

Features

- Fits directly to an Elettrika frame - sits beneath the case cover without impairing product appearance
- Supplied with fitting instructions and fixing screws
- Can be installed with other Cisa rim locks and needs to be positioned as close as possible to the lock
