

SILCA Air4 Residential Remote 4 Button

Description

The Silca Air4 range of remote controls is a first-rate solution for duplicating residential and commercial remote controls and allows the duplication of the largest range of fixed and rolling code remotes available within Europe. It comes in three different models, each covering either a different fixed or range of frequencies with each model is available in three different colour combinations. The Air4 remote controls are compact, durable, splash proof, ergonomically designed and are particularly suitable for barriers, gates and garage doors.

4 Buttons
